Introduction

This handbook is designed to provide students with an introduction to Georgia State University’s school psychology program, including information about the procedures and requirements for completing the Doctor of Philosophy (Ph.D.) degree with a Major in School Psychology. We hope your graduate studies in school psychology will be stimulating, challenging, and rewarding.

Georgia State University

Since it’s founding in 1913, Georgia State University (GSU) has experienced remarkable growth. Today, it is the largest urban research university in the Southeast, with over 50,000 students enrolled in undergraduate, graduate, and professional degree programs. Georgia State University features nice academic colleges and an educational philosophy that combines teaching, research, and service into one learning experience.

Georgia State University’s main campus is located in the heart of downtown Atlanta, in a six-block area that lies within the heart of the business, government, and retail districts. Because of its location, the campus is relatively easy to access. It is located within a few blocks of three major interstate highways, and mass transit service is available (bus service and rapid rail system) with routes that stop directly at the university.

Department of Counseling and Psychological Services

Mission Statement: Based on our commitment to diversity, advocacy and the belief that changes are possible, the mission of the department is to prepare competent professionals in counseling and psychological services, to contribute to the body of knowledge that undergirds these professions, and to provide service to the profession and the community.

The Department: The School Psychology Program is part of the Department of Counseling and Psychological Services (CPS) within the College of Education & Human Development. The CPS department offers master’s degree programs in clinical mental health counseling, clinical rehabilitation counseling, elementary/middle school counseling, secondary school counseling, and a combined Masters (M.Ed.)/Educational Specialist (Ed.S.) degree in school psychology. A Specialist in Education degree can also be obtained in school counseling. Finally, Ph.D. degrees are offered in school psychology, counselor education and practice, and counseling psychology. The school psychology and counseling psychology doctoral programs are fully accredited by the American Psychological Association (APA).

The CPS department prepares students for employment in settings such as rehabilitation clinics, public and private schools, correction agencies, colleges and universities, and mental health facilities. A concerted effort is devoted to providing students with the knowledge and skills to work in these particular environments. The CPS department recognizes that the attainment of such skills may extend beyond courses offered within
the department. Therefore, students may also take courses related to their interests from other departments and programs at GSU.

The CPS department is located on the ninth floor of the College of Education & Human Development. The department has been renovated and most classrooms are equipped with the latest technological features. Small conference rooms, observation areas, playrooms, and special classrooms were specifically designed for graduate level education. The department houses an extensive collection of assessment materials and equipment library of materials and equipment. Materials include books for bibliotherapy, kits for parent and teacher education programs, and other packaged materials for use with students.

School Psychology Program

As one of the first APA accredited school psychology programs in the nation, the school psychology program at Georgia State University has long been dedicated to educating highly skilled school psychologists. This dedication produces the largest number of school psychologists in the state of Georgia, many of whom deliver mental health and educational services to students and their families in diverse ethnic, cultural, and geographic settings.

The school psychology program offers programs of study leading to the combined Masters of Education (M.Ed.)/Educational Specialist (Ed.S.) and the Doctorate of Philosophy (Ph.D.) degrees. Predoctoral-level training is primarily oriented toward developing highly skilled practitioners who will promote the academic and social development of children and adolescents through the delivery of school psychology services. For this reason, predoctoral students acquire knowledge and skills that are particularly salient within the school setting (e.g., assessment, consultation, prevention/intervention). Although research methods are incorporated into predoctoral education, students at this level are more apt to be consumers, rather than producers, of research. Thus, predoctoral students develop expertise in basic research methodologies and in the psychometric theories and variety of assessment and evaluation strategies.
In comparison, doctoral-level education is oriented toward developing students who are proficient practitioners and researchers. At the doctoral-level, students learn and then refine their knowledge and skills in assessment, prevention/intervention, and consultation. Moreover, doctoral-level school psychology students are prepared to be producers of research. Thus, doctoral students learn to critically evaluate empirical studies, conduct original research, and contribute to the knowledge base in school psychology through scholarly publications and presentations.

Admission to the Ph.D. Program

Attainment of a Doctor of Philosophy (Ph.D.) degree ranks among the most respected accomplishments in any field. This reality imposes serious professional responsibilities upon doctoral students in school psychology. Such responsibilities demand that students maximize rather than minimize program obligations. For this reason, the program seeks students who are willing to expend additional effort beyond the basic requirements of the program. The School Psychology Ph.D. Program is interested in students who are committed to and capable of advancing the field of school psychology.

Admission to the program is highly competitive, with an average of three students accepted each year out of a pool that typically ranges from about 30-40 applicants. The faculty places primary emphasis on multiple criteria when considering an applicant for admission. Specifically, major consideration is given to applicants who: a) have completed undergraduate training in psychology, education, or a closely related field, b) aspire to become proficient clinicians and researchers, c) demonstrate high aptitude for graduate work, d) excel in an undergraduate major appropriate for doctoral studies in school psychology, e) are willing to complete a rigorous course of study, f) demonstrate awareness of multicultural perspectives, g) provide evidence of excellent oral and written language skills, and h) have outstanding potential for applied research in topics that are congruent with the expertise available at Georgia State University. Our program also accepts students who have already completed some predoctoral training in school psychology (i.e., masters and specialist degree requirements equivalent to those at GSU; see Appendix A) or a closely related field. For students who are admitted after graduate work at other institutions, the faculty evaluates previous training to determine how congruent it is to the GSU Ph.D. program requirements, and what, if any, additional coursework or practica are needed as part of each student’s doctoral program of study at GSU. In addition to official transcripts, this faculty review requires submission of a portfolio of work that demonstrates competency in the major objectives of the GSU doctoral school psychology program (see appendix A).

Based on these criteria, students accepted into the program over the years have obtained a mean Graduate Record Examination (GRE) score of approximately 305; a mean undergraduate grade point average of 3.3; and a mean graduate grade point average of 3.61. Our students are a diverse group in many respects and represent a variety of different cultures, geographic regions, and previous work and educational experience. Most of our doctoral students are registered as full-time students, and most complement their coursework and practica by working as part-time graduate research
assistants or graduate teaching assistants. The program actively recruits historically underrepresented students and strongly encourages their application.

Upon admission to the program, student performance is evaluated continuously and involves consideration of academic progress, as well as performance in laboratory, practica, and internship experiences. A student may be dropped from a course and/or the program if, in the judgment of the school psychology faculty, the student’s clientele or the functioning of a school or agency has been put in jeopardy because of the student’s behavior. A student may also be dropped from the program for failure to progress on the research requirements of the program. For those entering the program with a bachelor’s degree, the completion time is expected to be about six years. This includes completion of all coursework, practica, and doctoral internship, the residency requirement, satisfactory completion of the doctoral comprehensive examination or Examination for Professional Practice in Psychology, completion of the predissertation research requirement, and acceptance of the dissertation prospectus and subsequent dissertation research. The completion time for of the Ph.D. requirements for students entering the program with a specialist’s degree in school psychology is approximately four years. This includes three years of academic coursework and practica, one year of doctoral internship, the residency requirement, satisfactory completion of the doctoral comprehensive examination or Examination for Professional Practice in Psychology, completion of the predissertation research, and acceptance of the dissertation prospectus and subsequent dissertation research. Typically, students complete their doctoral internship and dissertation during their final year of the program. Students should consult the Georgia State University Graduate Bulletin and the College of Education & Human Development Guide for Doctoral Students for the year in which she or he is admitted for specific guidelines. The requirements outlined apply throughout the student’s studies until program completion.

School Psychology Ph.D. Program

Ph.D. Program Philosophy

The School Psychology Ph.D. Program at Georgia State University embraces a scientist-practitioner model of educating doctoral-level school psychologists. The philosophy of the program holds that research and practice are mutually beneficial activities. Through faculty mentoring, coursework, and practical experiences, doctoral students gain an understanding of how their clinical skills are enhanced by their research experiences, and how their research ideas are influenced by their experiences working in schools, clinics, and other settings. Doctoral students are educated to be highly skilled practitioners and researchers. The School Psychology Ph.D. Program is dedicated to preparing school psychologists with a high level of expertise in both areas.

Successful integration of science, research, and practice enables doctoral students to appreciate how both components are essential to providing the most effective educational and mental health services to children, adolescents, and their families, and the most insightful consultation services to teachers, parents,
and others. It also enables doctoral students to draw from many different knowledge bases and apply this information to solving difficult problems and unanswered questions. The integration of researcher and practitioner serves as the foundation for assuming leadership roles within the field of school psychology.

**While** a range of different theoretical orientations is accommodated (e.g., behavioral, cognitive, developmental), the school psychology program primarily espouses an ecological perspective. This perspective emphasizes how the reciprocal relationships among various components in an individual’s environment may influence her or his perceptions, cognition, and behaviors. This perspective provides the lens through which the School Psychology Ph.D. Program fosters the development of expertise in assessment and diagnostic procedures, preventive and remedial interventions, consultation and program evaluation, and research methodologies. Most importantly, a major emphasis is placed on understanding the multicultural factors that may influence these areas.

**Multicultural issues and perspectives** are an integral part of students’ education and professional preparation. As an urban research university GSU is surrounded by the rich ethnic and cultural diversity of metropolitan Atlanta. Thus, the school psychology program is uniquely situated to provide multicultural training to its students. Moreover, Georgia is comprised of a diverse ethnic, cultural, and linguistic population, living in a wide range of urban, suburban, and rural communities across the state. This diversity affords students the opportunity to acquire clinical and research experience in a variety of different settings.

**Finally**, the school psychology program encourages students to develop their own educational and career goals. Thus, each doctoral student formulates a program that reflects her or his particular interests within school psychology. Throughout their doctoral program, students work closely with faculty in designing their program of studies, providing psychological services in school and clinical settings, and conducting applied research in the field of school psychology. The GSU School Psychology Ph.D. Program prepares graduates to work in a variety of settings including colleges and universities, public and private schools, state agencies, and clinics.
GSU Ph.D. Graduates are Scientist-Practitioners

Scientists
To understand and advance basic knowledge in school psychology, students must have a solid foundation in psychological science, research, and research methodologies. Students are educated to be highly skilled consumers of basic and applied research. A strong foundation is provided in the basic science of psychology. Training in research is applied across all areas of the Ph.D. Program. Graduates must be able to interpret published and unpublished writing and research. Students must have extensive background knowledge to determine the utility and efficacy of psychological and educational instruments and interventions. As producers of research, students must apply appropriate research techniques to questions of local and national importance. Through faculty mentoring, students acquire an understanding of the scientific method, and learn the research skills necessary to conduct and evaluate research.

Practitioners
Graduates demonstrate a high-level of expertise in the practice of school psychology. Doctoral students are required to work toward completing coursework, practica, and internship experiences prior to, or as integral parts of their programs. Practitioner preparation encompasses over 3,000 hours of school-based practica and internship, in addition to coursework in assessment, intervention, consultation, and related areas. A minimum of 600 hours is required in pre-internship practicum experiences in school settings. Qualified faculty and site-based psychologists oversee all practica and internship experiences. This extensive preparation of practitioners is central to the program mission.
The School Psychology Ph.D. Program Goals and Objectives

Goal 1: To ensure that our graduates are prepared to work as professional school psychologists in a pluralistic, diverse society; that they are informed about and committed to legal and ethical practices; and that their practices are sufficiently grounded in the basic science of psychology.

Objective 1: Students will practice in ways that are ethical and legal.

Objective 2: Students will practice in ways that reflect knowledge and understanding of the racial, ethnic, experiential, economic, and/or linguistic backgrounds of their clients.

Objective 3: Students will practice in ways that demonstrate that their practices are sufficiently grounded in the basic science of psychology.

Goal 2: To ensure that our graduates can use research findings and properly conduct research, particularly research regarding the practice of psychology in educational settings.

Objective 1: Students will gain knowledge in psychological research design and methods of analysis.

Objective 2: Students will be able to communicate information from and about research and evidence-based interventions effectively.

Objective 3: Students will be able to independently conduct psychological research in educational settings.

Goal 3: To ensure that our graduates are proficient at providing preventive intervention, remedial intervention, consultation, and psycho-educational assessment as professional strategies targeted to the needs of learners, parents, and schools.

Objective 1: Students will implement a prevention/early intervention program.

Objective 2: Students will design and implement evidence-based remedial interventions

Objective 3: Students will demonstrate theoretical knowledge and applied skills when consulting with teachers, parents, and other professionals.

Objective 4: Students will demonstrate theoretical knowledge and applied skills when conducting psychoeducational assessments and use the assessment measures in non-biased, valid, and reliable ways.
Mentoring of Students

Faculty Advisor. New students are assigned a faculty advisor from the school psychology faculty. All students should meet with their advisor on a regular basis to discuss program planning, research opportunities, professional development, and other program issues. Frequent communication between student and advisor facilitates a well-designed program of study and professional development plan. Students are free to change advisors at any time during their graduate career in the school psychology program.

During the second year, doctoral students form a Program Advisory Committee consisting of their faculty advisor (as committee chair) and two other faculty members, one of whom may be from outside the school psychology program. Post-Ed.S. students form the Program Advisory Committee after one year. After forming a Program Advisory Committee, students should give committee members a tentative program of study with a projected timeline. This should be submitted to the committee no later than four semesters following admission into the doctoral program (or in the third semester for post-Ed.S. students). To encourage accountability, doctoral students are asked to meet with their committee and submit an annual summary of progress at the end of each academic year (this meeting will be held until the student begins their internship or graduates). Student progress is reviewed at least annually by the school psychology faculty. Students receive a letter about their progress based on that review. This document is kept in the student’s permanent file.

Research Mentoring. Faculty members mentor students about research throughout their doctoral programs in a variety of ways. First, faculty members act as role models by conducting research and presenting research findings in peer reviewed journals and at professional meetings. Second, faculty members involve students as paid or volunteer assistants in their research projects. Research collaborations enable students to learn various aspects of the scientific process including research design; data collection, entry, and analyses; writing for publication; and presenting findings at professional conferences. Third, faculty members provide advice to student-initiated research projects through informal mentoring and/or directed reading courses. Finally, faculty members encourage students to collaborate with other faculty and students on research projects, presentations, and publications.

Dissertation Mentoring. After the second year (or three semesters for post-Ed.S. students), students should begin to identify a faculty member with similar research interests to serve as chair of their dissertation committee. The dissertation chair may or may not be the same as the student’s academic advisor. After the dissertation chair is identified, the student should form a dissertation committee according to the College of Education & Human Development guidelines. The dissertation chair and student should meet on a regular basis to discuss the student’s dissertation research project.
Peer Mentoring. New students are assigned an advanced graduate student to serve as a peer mentor. Peer mentors help new doctoral students acclimate to the Ph.D. program.

Policy on Student Development and Retention

The Department of Counseling and Psychological Services (CPS) is committed to the professional and personal development of students in all of its masters, Ed.S., and doctoral programs. Because completion of all of these programs leads directly to entry into the professions, the CPS faculty members place considerable emphasis on academic performance as well as on students’ suitability for responsible participation in their chosen field. To meet this obligation, CPS faculty members monitor both academic performance and non-academic behavior in order to identify, nurture, and support appropriate behaviors and respond and intervene when inappropriate behaviors are noted. This policy describes the procedures for monitoring and supporting professional and personal development of all students. It also outlines the review and retention procedures in each of the CPS training programs (masters, Ed.S. and doctoral) that will be implemented when inappropriate behaviors have been identified. At any time, the seriousness of a given incident or set of behaviors may result in a decision by the Program Faculty, the Program Coordinator, and the Department Chair, in consultation with the University’s Office of Legal Affairs, to bypass intermediate steps and convene the Department’s ad hoc Retention Committee to gather information and recommend departmental action in the matter.

Monitoring and Supporting Student Development:

1. Once a student is accepted into a program, the Program Coordinator for each program will create a file for each student. These files will be maintained by individual Program Coordinators throughout the student’s time at GSU in the CPS department and may be viewed by students by making an appointment with the program coordinator or other authorized faculty member. Persons having access to the contents of this file include the student, the Program Coordinator for the specific program in which the student is enrolled, and Chair of the CPS Department. In the event that student behavioral concerns rise to a level that warrants review by the Review Committee and/or a Retention Committee (please see item #2 for more information regarding these committees), then the faculty members participating on those committees will be granted access to the students’ files. Students will be informed of all items that are entered into their folders and those items may include but are not limited to written reports made by faculty of academic and non-academic behavioral concerns, recognition of special or exceptional academic and non-academic student achievements, recommendations and/or decisions rendered by Review Committee and Retention Committee. Students are encouraged to contribute their own materials to this folder including responses to any behavioral reports and/or corrective action recommendations. All items entered into students’ folders are to be written and submitted to the Program Coordinator. The Program Coordinator is responsible for maintaining student files.

2. At the beginning of each Fall Semester, Program Coordinators for each Master’s/Ed.S./Doctoral program will name a Review Committee of two faculty members who will have the responsibility of reviewing the non-academic reports for
Master’s/Ed.S./Doctoral students in their respective program. At their discretion, Program Coordinators assign this Review Committee to review students' files and the documentation therein contained related to students’ academic and non-academic behaviors that have raised concern in the Program. Decisions and recommendations rendered by the Review Committee will be sent in writing to the Program Coordinator who will then disseminate those to the student being reviewed and the Chair of CPS.

3. Students’ files may contain positive information regarding their non-academic behaviors in the program. Additionally, students' files may contain special acknowledgement of exceptional performance. With students' permission, these accolades may be used by the Program Coordinator to benefit individual students and or the program through such things as program, departmental, or college awards and scholarships, and decisions regarding admission in advanced degree programs at GSU.

4. Each semester the Program Coordinators for each training program will review student folders containing letters of academic and non-academic concerns for all students in the program. He/she will review the folders for indications of repeated incidents, both positive and negative. The Program Coordinators will compose a statement citing positive behaviors in a letter format and will send it to every student who fits the criteria. In the event of repeated negative behavior, the Program Coordinators will issue letters requesting face-to-face meetings with students who fit the criteria. During these meetings, the Program Coordinator will review a written document citing the negative behaviors and discuss corrective action with the student. The written statement citing the negative behaviors and the corrective action related to them will be signed by the student and the Program Coordinator with one copy being provided to the student and another copy being entered into the student’s file. At the discretion of the Program Coordinator, negative statements and accompanying information may be reviewed by the Review Committee for possible additional action by the Program Faculty.

5. Negative statements and accompanying information may form the basis for the following action by the Review Committee:

   a. preparation of a written statement for the student showing the seriousness of the recorded negative behaviors and the expectation of receipt of satisfactory completion of a program to correct or stop the behaviors; or

   b. review of the student’s suitability for the respective profession by the entire Program Faculty who may, in turn, recommend remedial work* for the student; or

   c. referral of the matter to the Department Chair for the formation of a Retention Committee for a formal hearing.

* Remedial work is any program of activity agreed upon by both the faculty and the student designed to remove or correct negative behaviors within a specified time.

Review and Retention
1. In all review and retention situations, department faculty members retain responsibility for management of their own classrooms. If student behaviors are disruptive to the learning environment created in the classroom or in field experiences linked to course assignments, faculty members have the right to take immediate action to remedy problematic student behaviors. Faculty is encouraged to use the University’s Disruptive Student Conduct Policy. In such instances, faculty members make record of student behaviors and the resulting remedial action taken then submit this documentation to the Program Coordinator for entry into the student folder.

2. Department faculty members are charged with the responsibility of continuous evaluation of all student behaviors throughout a student’s enrollment in his/her program. At any time, a faculty member may prepare a statement citing positive or negative behaviors of a student. Documentation of student behaviors must meet the following criteria:

   a. Students must be informed of the documentation regarding their behaviors and acknowledge receipt of such documentation. They must also acknowledge that the report will become a part of their student file to be kept in the Department for review by the Program Coordinator and may be used in a future retention review. In the case of printed documentation, those acknowledgements are confirmed by students’ signature on the written statement. In the case of electronic documentation transmitted through email, acknowledgements are confirmed by student response to faculty emails.

   b. If the student refuses to sign the statement or respond to an email, the faculty member will note that on the statement and forward this to the Program Coordinator.

3. Following the written statement regarding the negative behavior, the faculty member and student determine an appropriate remedy to the behavior. This next step may have one of two results.

   a. If the faculty member and student agree on a remedy, they will write a brief statement (acknowledged by both the student and the faculty member) indicating agreement and submit this statement to the Program Coordinator of the program for which the student is enrolled.

   b. If the student and the faculty member do not agree on a course of action, the student or the faculty member may take the issue to the Program Coordinator. The Program Coordinator may refer the concern, including all available documentation, to the Review Committee of the respective program. That Review Committee will then recommend a course of action to the Program Coordinator. This may result in a recommendation that requests the formation of a Faculty Retention Committee to review the matter. The Program Coordinator will communicate all recommendations to both the student involved in the review and the Chair of CPS.

4. If, in the faculty member’s and/or Program Coordinator’s opinion, the behavior rises to
the level of referral to the Retention Committee, the Review Committee, as an intermediate step, may elect to conduct additional inquiry by contacting those faculty members who have contributed written documentation to the student’s file. The intention is to develop plans prior to a full retention committee hearing which are considered “positive” and perhaps empowering the student to facilitate the process and to engage in self help.

If the intermediate step is unsuccessful or the behaviors(s) is (are) considered beyond the scope of the Review Committee, the Review Committee can recommend to the Program Coordinator a referral for a full Retention Committee.

In either event, copies of the Review Committee’s recommendation will be sent to the Program Coordinator and the faculty member/s initiating the process. The recommendations may also require referral to Georgia State University's Office of Legal Affairs.

5. The ad hoc Retention Committee is the last step in the review of a student’s academic and/or non-academic suitability for entering the profession if a problem has been identified. The procedure for the formation and conduct of the Retention Committee is as follows:

   **Procedures for Retention Committee Hearings**

   The procedures for the Retention Committee Hearing are as follows:

   1. The Program Coordinator of the program in which the student in question is enrolled will, after consultation with the Program Faculty, request from the Department Chair the appointment of an ad hoc Retention Committee to receive information as regards the suitability of the student for the program.

   2. The Department Chair will then appoint three faculty members from the department faculty-at-large who have not had the student in question in any class, or supervised the student in any activity in the department or had any relationship with the student in any other activity. One of the three faculty members will also be appointed Retention Committee Chair.

   3. The Department Chair will brief the committee members on the purposes and procedures of the hearing process. Attorneys from the University’s Office of Legal Affairs may be included in these discussions if there are questions about the procedures.

   4. The purposes of the Retention Hearing are to (a) gather information regarding the student’s behavior, (b) consider the information given in light of the concerns about the student’s suitability for the program and (c) prepare a recommendation for the faculty regarding the student’s future participation in the program.
5. The Department Chair will send an E-mail to the student notifying the student of the formation of the ad hoc Retention Committee to consider the student’s suitability (academic and/or non-academic) for the program. The letter will identify the Retention Committee members and Chair and notify the student that additional information will be forthcoming from the Retention Committee Chair.

6. The Retention Committee Chair will develop a calendar of events for the preparation of the Retention Committee Hearing, the date for the Hearing, and notification of persons to appear for the Hearing. The student will be given notice of the above date and information by the student’s official GSU E-mail address at least seven days (7) in advance of the hearing.

7. The student will be informed of the information received and the persons who will appear to present information to the Retention Committee. At least seven days (7) prior to the date of the Retention Committee Hearing, the student will be sent copies of all documents and the names of all who will appear. The student should provide to the Retention Committee Chair a copy of all documents that he/she will submit to the Committee at least two business days prior to the Retention Committee Hearing. The student may choose to present information at the Hearing or have persons present information relevant to any incidents described in the information received by the Committee.

8. The Retention Committee Chair will be responsible for securing appropriate space for the Hearing, providing the necessary supplies and equipment for recording the Hearing, and notifying persons who are to provide information about the date, time and location of the Hearing.

9. The student is to be informed that the Hearing will not allow for participation by an attorney or other representative. However, an attorney or representative may accompany and give advice to the student. The student is to notify the Chair of the Retention Committee if an attorney or representative will be present. The Retention Committee Chair will, in turn, notify the University’s Office of Legal Affairs of the expected presence of an attorney or representative and the person’s name.

10. The Retention Committee Chair shall preside over the Hearing and be responsible for recording the Hearing.

11. All oral presentations will be recorded and the person providing the information will be asked to affirm the truthfulness of the information presented; written presentations must be signed by the preparer and have a statement swearing or affirming the truthfulness of the information included with the written material. The student has the right (at his/her expense) to receive a copy of tapes of the Hearing and documents presented.

12. Members of the Committee and the student may ask questions of persons providing information for the purpose of clarifying information; as this is not intended to be an
adversarial proceeding, no questions can be asked except to clarify material presented to the Committee. The student will submit all questions in writing to the Chair of the Retention Committee.

13. At the conclusion of the presentation of the information, the student will be allowed an opportunity to present information to challenge the information presented as well as describe their own understanding of events.

14. After all information has been received, the Retention Committee will meet in closed session to discuss the information received and develop a recommendation to the CPS Faculty. The Committee has the following options for framing the recommendation: a) no additional action is necessary; b) the student may continue in the program with stipulations as to corrective measures to remove behavioral deficits; c) the student must leave the program for a prescribed period, take action to correct or remove behavioral deficits, then return to the Retention Committee to present information supporting their return to the program; or d) the student should be removed permanently from the program. The Retention Committee will prepare a written statement of its decision.

The Retention Committee will base its recommendations to the CPS Faculty on professional behaviors expected of all counselors and counselors in training. These professional behaviors are directly related to the Professional Codes of Ethics of the American Counseling Association and the American Psychological Association, licensing laws of Professional Counselors and Psychologists, and the accrediting bodies: American Psychological Association and Council for the Accreditation of Counseling and Related Educational Programs (CACREP), and the Council on Rehabilitation Education (CORE). The following list provides examples of behaviors and attitudes expected of successful counseling students. This list is not exhaustive, but rather serves as a guide to the student and to the Retention Committee.

Characteristics Expected of a Successful Student

- Integrity
- Self Awareness
- Ability to successfully complete the academic course work required in the program
- Sensitivity to individual differences and respect for diversity among fellow students, staff, faculty, and clients.
- Respect for and adherence to the Code of Ethics of the American Counseling Association (for Mental Health Counseling students, School Counseling Students and Rehabilitation Counseling students) or the American Psychological Association (for Counseling Psychology students and School Psychology students) and ASGW Code of Ethics for group work.
- The ability to accept and make use of feedback from faculty regarding one’s progress in the program as it relates to academics, interactions with fellow students and faculty, and clinical skills.
The commitment to upholding confidentiality with fellow students in interpersonal and supervisory experiences and also with clients in practicum and internship.

Awareness of how to maintain appropriate interpersonal boundaries with faculty, fellow students, and clients.

Ability to interact appropriately and effectively with other students, faculty, and staff.

15. The Retention Committee Chair will present its recommendation to the CPS faculty. The faculty will discuss the Committee’s findings and approve, disapprove or modify the Retention Committee’s recommendation. A majority vote of the faculty will be necessary to carry the motion.

16. The Retention Committee Chair will prepare a report of the faculty decision for the Department Chair and the student. The student will receive a copy of the faculty’s decision via official GSU email.

17. The student may appeal the CPS faculty’s decision by following the printed appeals procedures described in the College of Education & Human Development Catalog.

- Reviewed, revised and approved by the CPS faculty on August 19, 2014.

University Grievance Procedures

Georgia State University seeks to maintain the highest standards of integrity and fairness in its relationships with students. The Undergraduate Catalog and the Graduate Catalog (both found at http://www.gsu.edu/es/catalogs_courses.html), and the Student Code of Conduct (http://codeofconduct.gsu.edu/) set forth policies and requirements for Georgia State students. Students are expected to know and comply with these policies. Students may, however, seek relief or resolution when they believe that:

A. The application of these policies and procedures will create undue hardship for them or will not recognize their extraordinary or extenuating circumstances; or

B. Specific actions, practices, or decisions on academic or non-academic matters have been made or carried out in an arbitrary, discriminatory, or inequitable manner.

All Georgia State University students have the right to file grievances following the university policy that can be found at http://deanofstudents.gsu.edu/student-assistance/student-complaints-petitions/. The GSU School Psychology Ph.D. Program recognizes students’ right to file grievances and adheres to the University Policy.

Katie Lowry, Business Manager II
Yolanda Miller, Fiscal Grants Specialist
Yolanda Parker, Administrative Specialist - Administrative
Major responsibility for the school psychology program is shared by five full-time school psychology faculty members and faculty members with joint appointments. An additional faculty member serves the program on a half-time basis. Other support for the program is provided by the remaining 13 faculty members in the Department of Counseling and Psychological Services (CPS), and by faculty members in other departments within the College of Education & Human Development.

Students receive ongoing mentoring and guidance from the faculty in planning their studies and research, and in writing their dissertations. The faculty-to-student ratio is excellent. Consequently, faculty members are highly involved in the professional and personal development of their students. Above all else, students can look forward to the support of a faculty committed to developing its students.

Upon acceptance into the program, students are assigned a faculty advisor from the school psychology faculty. Students meet with their advisors on a regular basis to discuss program planning, research opportunities, professional development, and other issues. Students are free to change advisors at any time during their graduate program.

All doctoral students complete a dissertation that is derived from data-based original research. Doctoral students should identify a faculty member to serve as their dissertation chair whose research interests match their own. The dissertation chair does not have to be the student’s academic advisor. After the dissertation chair is identified, the student forms a dissertation committee based on College of Education & Human Development guidelines. The dissertation chair and the student meet on a regular basis to discuss the progress of the dissertation.

School Psychology Faculty

Stephen D. Truscott, Psy.D.  Associate Professor,  School Psychology Ph.D. Program Coordinator

Dr. Stephen Truscott graduated from the Alfred University School Psychology Program in 1984. He practiced in New York State before joining the Alfred University School Psychology Faculty. He completed his Psy.D. at the University at Albany in 1998 and was on the faculty at the University at Buffalo, SUNY until December 2004. He joined the School Psychology Program at Georgia State University in January of 2005.

Dr. Truscott’s research interests include applied research about pre-referral intervention teams, school-based consultation, and professional school psychology. He is past Editor of the Journal of Educational and Psychological Consultation. His work has appeared in School Psychology Quarterly, School Psychology Review, the Journal of School Psychology, Psychology in the Schools, the Journal of Psycho-educational Assessment,
the Journal of Educational and Psychological Consultation, Remedial and Special Education, Psychological Reports, School Psychology International, Phi Delta Kappan, and the Communiqué. He was a guest editor for a special issue of School Psychology Quarterly and is on the editorial boards of the Journal of School Psychology and the Journal of Educational and Psychological Consultation. He was identified as a Talented Early-Career Scholar by the Society for the Study of School Psychology in 2001, received the University at Buffalo Graduate School of Education Outstanding Early Career Researcher award in 2002, and won the Article of the Year award from APA Division 16/ School Psychology Quarterly in 2005. In 2012, an article co-authored with former GSU student Sherrie Proctor was recognized as a finalist in the Article of the Year award for the Journal of School Psychology. He is a member of the Society for the Study of School Psychology. Steve has provided consultation and program review services to 24 school districts and has been teaching the Leadership Seminar for the GaLEND program in the Center for Leadership in Disability for the past three years.

School Psychology Faculty

Dr. Kris Varjas, Psy.D.  
Professor  
Director, Center for School Safety, School Climate and Classroom Management

Dr. Varjas received her Psy.D. in school psychology from the University at Albany, State University of New York and her M.S.W. from the University of Connecticut. Dr. Varjas worked as a social worker for several years in a shelter serving women who were homeless. Dr. Varjas has been a faculty member in the CPS department since 2000. Current research efforts include school- and community-based research investigating bullying, cyberbullying, school safety and school climate. She is a Director of the Center for Research on School Safety, School Climate and Classroom Management at Georgia State University. Dr. Varjas has been working with and researching issues related to lesbian, gay, bisexual, transgender and questioning (LGBTQ) youth and those perceived to be LGBTQ, including homophobic bullying, cyberbullying, school safety, and school climate. Dr. Varjas also has conducted applied research on mental health and health risk among school-age and adult populations in the United States, India and Sri Lanka. Her interests include international and national mental health promotion, developing culture-specific prevention and intervention programs and the use of mixed methodology in school psychology practice. Dr. Varjas is the co-author of a book published by the American Psychological Association entitled School-Based Mental Health Services: Creating Comprehensive Culturally Appropriate Service Programs. She has received awards from the Georgia Association of School Psychologists and Georgia State University for her work with diverse populations in the United States and in Sri Lanka. Dr. Varjas is a member of the Society for the Study of School Psychology. Dr. Varjas received the 2014 Distinguished Faculty Member Award from the GSU College of Education & Human Development.
Catherine Perkins, Ph.D.  
Assistant Clinical Professor,  
School Psychology M.Ed./Ed.S. Program  
Coordinator

Dr. Perkins received her Ph.D. in school psychology with a specialization in neuropsychology from Georgia State University (GSU) in 1994. Prior to joining the faculty at GSU, she worked for ten years with the Georgia Psychoeducational Network as both a school psychologist and administrator. Dr. Perkins is a Licensed Psychologist in the state of Georgia and serves as the University Representative to the Executive Board of the Georgia Association of School Psychologists (GASP). She currently is a Past President of GASP and a member of the executive committee.

Dr. Perkins currently serves as the Coordinator for the M.Ed./Ed.S. School Psychology training program. She teaches a variety of courses in the CPS department including Multicultural Counseling, Educational and Psychological Appraisal, Child and Adolescent Psychopathology, Social Emotional Assessment of Children and Adolescents, Biopsychosocial Aspects of Addiction, and Advanced Ethical Decision Making.

Dr. Perkins is a member of Phi Beta Delta, the honor society for international scholars and is currently conducting international research on mental health services for children. Her research interests include looking at the effects of cultural immersion experiences on students' development of multicultural awareness and the delivery of mental health services in third world countries.

Joel Meyers, Ph.D.  
Regents Professor,  
School Psychology Programs  
Counseling Psychology Program  
Executive Director, Center for School Safety,  
School Climate and Classroom

Dr. Meyers received his Ph.D. in educational psychology with a specialization in school psychology from the University of Texas at Austin. Prior to joining the faculty at Georgia State University, he served on the faculty in School Psychology at Temple University and the University at Albany. Dr. Meyers has served as the director of the School Psychology Programs at the University at Albany and Georgia State University. He has also served as president of Division 16 of the American Psychological Association, and Editor of the Journal of School Psychology.
Currently, Dr. Meyers is the Executive Director of the Center for Research on School Safety, School Climate and Classroom Management at Georgia State University. He teaches courses related to school-based consultation. Dr. Meyers’ major research interests include: primary prevention of learning and adjustment problems in children; prevention of violence in schools and communities; school-based consultation and pre-referral intervention; and school reform.

**School Psychology Faculty**

**Ethan Van Norman, Ph.D.   Assistant Professor**

Dr. Van Norman received his Ph.D. in educational psychology with a minor in quantitative methods from the University of Minnesota-Minneapolis in 2015. He completed his pre-doctoral internship in school psychology at Heartland Area Education Agency 11 in Iowa. His research primarily focuses on evaluating and improving the technical adequacy of academic and behavioral measures used in schools. In addition, Van Norman conducts research aimed at building the capacity of educators and school psychologists to use data meaningfully to make sound educational decisions. He was awarded an Eva O. Miller doctoral fellowship for his work on progress monitoring and data-based decision making.

**School Psychology Faculty**

**Dr. Andrew Roach   Associate Director, Center for Leadership in Disability**

**Associate Professor, School Psychology (College of Education & Human Development) and Health Management & Policy (School of Public Health)**

Dr. Roach received his doctorate in Educational Psychology with an emphasis in School Psychology from the University of Wisconsin—Madison in 2005. He was an elementary teacher for 9 years prior to his doctoral work and also has a graduate degree in Education from the Claremont Graduate University. He holds joint appointments in the College of Education & Human Development and School of Public Health.

His major areas of interest include the design and implementation of inclusive standards-based reforms and large-scale assessment and accountability systems. Dr. Roach provides systems-level consultation and technical assistance regarding alternate assessments for students with disabilities to state departments of education across the nation. He currently serves as a co-investigator and consultant on multiple grants. Dr. Roach received the 2007 Early Career Publication Award from the Council for Exceptional Children-Division of
Research for his research on the influence of access to the general curriculum on the alternate assessment performance of students with disabilities.

Dr. Roach also has interests in early intervention with preschool and elementary school children experiencing learning and social-emotional difficulties. Before coming to GSU, he was an assistant professor of Pediatrics and the Coordinator of the Family-Centered Positive Behavior Support program at Vanderbilt University Children’s Hospital.

Dr. Roach is an Associate Editor for the Journal of School Psychology and serves on numerous editorial boards.
Ph.D. Program of Study

***NOTE: In all cases, the graduate catalog (or addendum) for the year that the student entered the program (or a later year if so adopted) is the definitive source for determining the required program of study.

The Ph.D. program of study includes College of Education & Human Development and school psychology program requirements. 141 semester hours of coursework are required beyond the Bachelor’s degree and 71 beyond the educational specialist’s degree, including doctoral internship and dissertation requirements. A student’s program of study is planned in consultation with his or her graduate advisor and program advisory committee.

The doctoral program typically involves three stages, which often overlap to some degree. The first stage consists of fulfilling the requirements established by the College of Education & Human Development and the School Psychology Program for the M.Ed./Ed.S. in School Psychology. The second stage involves successful completion of the advanced series of courses: a predissertation research project; a comprehensive examination; and approval of the dissertation prospectus. After meeting these requirements, a student is advanced to candidacy for the Ph.D. degree. The third or in-candidacy stage is devoted to independent research, preparing the dissertation, and pre-doctoral internship in school psychology.

Please note that if any of the courses listed below have been taken prior to admission to the doctoral program, appropriate substitutions may be made with the approval of the student’s doctoral committee and the College of Education & Human Development.

Practicum Placements. Practicum placements are essential parts of doctoral training in school psychology. They provide students with opportunities to learn practical skills, applications of science and theory, and to practice the school psychologist’s major professional roles and functions under the direct supervision of university faculty and site-based supervisors. Students participate in a graduated sequence of practicum experiences over the course of at least 3 semesters. Throughout practica, students receive extensive supervision and professional role modeling. There are 3 required practicum experiences in the GSU School Psychology Program. Applied Practice I and II take place in public schools in the greater Atlanta area. Together, they require at least two semesters of approximately 2 days per week to total 600 hours and 6 credit hours of coursework. Placements are arranged by the student and local school districts that have been approved by the School Psychology Program. All placements must be pre-approved by the Program. CPS 8680 Internship in School Psychology is the Advanced Doctoral Practicum. The PhD program requires one semester of full-time placement in CPS 8680 (600 hours) or two semesters of part-time placement in CPS 8680 (660 hours). However, to receive Ed.S. certification you must complete 12 credit hours of CPS 8680, which is 1200 hours over at least two semesters. At least half of these 1200 hours must be completed in a school-based setting to receive the Ed.S. certification. It is possible, with the prior approval of the faculty, to arrange a 600 hour advanced doctoral practicum in
a special school, clinic, or non-school setting if the setting provides experiences that are consistent with professional school psychology practices and includes appropriate supervision by a licensed psychologist. For students entering with an Ed.S. or the equivalent, the student’s doctoral advisory committee will determine whether the student has completed a comparable course in a prior graduate work and has sufficient skills and field experience to meet the criteria for this doctoral practicum. Based on input from the doctoral advisory committee, some students may be required to enroll in an additional practicum experience. In all cases, students must complete 1200 total hours in supervised school-based settings across all practica and the doctoral internship.

**Important note for students entering with an Ed.S. or other prior graduate degrees:** Your previous coursework will be evaluated to determine whether it meets the GSU Ph.D. program requirements, objectives and competencies. To facilitate that process, you must compile a portfolio of prior classwork, syllabi, and evidence of competence. The school psychology faculty will review your portfolio to determine which competencies and courses you have completed. You may be required to re-take coursework or practica taken previously and/or supplement your previous coursework with courses taken at GSU.

The BA/PHD Program in School Psychology is comprised of courses from the M.Ed., Ed.S. and, PhD requirements as outline below.

**Program of Study for Master of Education in School Psychology** (M.Ed.)

A. Professional Studies (9)
   Required (6):
   - EPRS 7900 Methods of Research in Education (3)
   - Any 7000-level or above EPY course in Learning Theory (3)
     (acceptable courses include: EPY 7080- The Psychology of Learning and the Learner; EPY 7090- Psychology of Learning and the Learner: The Young Child; EPY 8050- The Psychology of Instruction; EPY 8070- Understanding and Facilitating Adult Learning; EPY 8080- Memory and Cognition; EPY 8120- Motivational Factors in Learning and Behavior; EPY 8010- Learning and the School Age Child

   And Select One (3):
   - EPSF 7100 Critical Pedagogy (3)
   - EPSF 7110 Multicultural Education (3)
   - EPSF 7120 Social and Cultural Foundations of Education (3)

B. Major (27)
   Required (27):
   - CPS 6040 Introduction to School Psychological Services (3)
   - CPS 6410 Basic Counseling Skills (3)
   - CPS 7490 Individual Assessment I (3)
   - CPS 7495 Individual Assessment 1: Lab (2)
   - CPS 7510 Individual Assessment II (3)
CPS 7515 Individual Assessment II: Lab (2)
CPS 7520 Data-Based Decision Making for Academic Interventions in School Psychology (2)
CPS 7570 Psychological Consultation in the Schools I (3)
CPS 7662 Applied Practice I: School Psychology (3)
CPS 8440 Social/Emotional Assessment of Children and Adolescents (3)

**M.Ed. Program total: minimum of 36 semester hours**

**Program of Study for Specialist in Education in School Psychology (Ed.S.):** (requirements of M.Ed. are prerequisite for Ed.S.)

A. Professional Studies (9)
   Required (9):
   EPRS 8530 Quantitative Methods and Analysis in Education I (3)
   EPY 8220 Advanced Developmental Psychology: Personality and Socialization (3)
   Any 7000-level or above EXC course with permission of advisor (3) (EXC 7160 Social and Emotional Behavior in Students with Behavior and Learning Disabilities (3) [required for MINRS])

B. Teaching Field/Major (34)
   Required (34):
   CPS 6150 Ethical and Legal Standards in Counseling and Psychological Services (2)
   CPS 6450 Group Counseling (3) OR CPS 8400 Introduction to Play Therapy (3) OR
   CPS 8431 Counseling Skills and Strategies for School-Aged Children [required for MINRS]
   CPS 7340 Social/Cultural Issues in Counseling and Psychological Services (2)
   CPS 8540 Child/Adolescent Psychopathology (3)
   CPS 8570 Psychological Consultation in the Schools II (3)
   CPS 8662 Applied Practice II: Consultation and Intervention Practice in School Psychology (3)
   CPS 8680 Internship in School Psychology (12)
   CPS 8760 Topical Seminar in School Psychology (3)
   CPS 8665 Intervention Strategies for Students with Learning Problems (3)

**Ed.S. total: minimum of 43 semester hours**

**Program of Study for Doctor of Philosophy in School Psychology (PhD):** (requirements of M.Ed. and Ed.S. are prerequisite for PhD with the exception of the Ed.S. internship as described above)

**Core Area 18 credits (12 for B.A. – to Ph.D students) (College of Education & Human Development requires 18 minimum semester credit, of which, 6 are carried forward from the M.Ed./Ed.S. for students who enter directly from undergraduate studies)**
The purpose of the core area is to develop knowledge about key educational concepts and general research competence including expertise in at least one particular research paradigm appropriate to a student’s major field of study and/or dissertation research. In addition, the core area is intended to develop doctoral student’s awareness of the context in which educational issues can be understood and interpreted. Thus, the core area represents a uniform requirement of the College of Education & Human Development to provide a common body of knowledge to all doctoral students.

A. Research Core (15 hours)
Choose one course (3):

- EPRS 8500 Qualitative/Interpretive Research in Education I (3)
- EPRS 8530 Quantitative Methods and Analysis in Education I (3)
- 

Required (12):
A two course sequence (6 hours) in research methodology and two courses (6 hours in advanced research methods as identified by the Doctoral Advisory Committee.

Research Tracks. The students and doctoral advisory committee identify a research track based on methodology to be employed in the students’ dissertation research. The doctoral advisory committee may require additional coursework in a research track.

Quantitative Methodology
- EPRS 8540 Quantitative Methods and Analysis in Education II (3)
- EPRS 8550 Quantitative Methods and Analysis in Education III (3)
- EPRS 8820 Institutional Research (3)
- EPRS 8830 Survey Research, Sampling Principles and Questionnaire Design (3)
- EPRS 8840 Meta-Analysis (3)
- EPRS 8660 Bayesian Statistics (3)
- EPRS 9550 Multivariate Analysis (3)
- EPRS 9560 Structural Equation Modeling (3)
- EPRS 9570 Hierarchical Linear Modeling I (3)
- EPRS 9571 Hierarchical Linear Modeling II (3)
- EPRS 9900 Advanced Research (3)

Qualitative Methodology
- ANTH 8010 Qualitative Methods in Anthropology (3)
- EPRS 8510 Qualitative Research in Education II (3)
- EPRS 8520 Qualitative Research in Education III (3)
- EPRS 8640 Case Study Methods (3)
- EPRS 8700 Visual Research Methods (3)
- EPRS 9120 Poststructural Inquiry (3)
- EPRS 9400 Writing Qualitative Research Manuscripts (3)
- EPSF 9280 Interpretive Inquiry in Education (3)
Single-Case Methodology
EPY 8850 Introduction to Single-Case Methodology (3)
EPY 8860 Applications of Single-Case Methodology (3)

Historical/Philosophical Methodology
EPSF 9850 Historical Research in Twentieth Century American Education (3)
EPSF 9930 Philosophical Analysis and Method (3)

Measurement Methodology
EPRS 7920 Classroom Testing, Grading, and Assessment (3)
EPRS 8920 Educational Measurement (3)
EPRS 9350 Introduction to Item Response Theory (3)
EPRS 9360 Advanced Item Response Theory (3)

Social Foundations of Education and Psychology of Learning Core (3 hours)

In addition to highly specialized research in specific areas, doctoral students in the College of Education & Human Development must possess a deep understanding of comprehensive, theoretical principles and broad ideological conceptualizations. Through historical, philosophical, sociological, and anthropological inquiry, knowledge of social foundations fosters the types of speculative investigations essential for thorough understandings of those theoretical principles and ideological conceptualizations necessary to uphold the integrity of the Ph.D. degree.

EPY 8220 Advanced Developmental Psychology: Personality and Socialization (3)
EPSF 8270 Philosophy of Education (3)
EPSF 8280 Anthropology of Education (3)
EPSF 8310 Sociology of Education (3)
EPSF 8320 Politics and Policy in Education (3)
EPSF 8340 History of American Education (3)
EPSF 9260 Epistemology and Learning (3)
EPY 8030 Advanced Applied Behavior Analysis (3)
EPY 8050 The Psychology of Instruction (3)
EPY 8070 Understanding and Facilitating Adult Learning (3)
EPY 8080 Memory and Cognition (3)
EPY 8180 Development During School Age (5 to 18 Years) (3)
EPY 8200 Advanced Developmental Psychology: Cognition and Intellect (3)

B. Major Area
Required: 38 (35 for B.A.-to-Ph.D. students)

The major area of requirements complete the basic body of knowledge for applied professional practice as a school psychologist, building upon the foundation acquired at earlier graduate levels school psychology. A minimum of credits must be earned in the doctoral major, and these must include the courses listed below. Content for some of the required courses listed below may have been obtained in the master's or Ed.S. program.
prior to admission to the doctoral program. In such cases, appropriate substitutions and/or credit for prior coursework, may be made with approval of the student’s doctoral advisory committee. Students who have prior coursework that is judged by the advisory committee to meet some of theses course requirements must earn a minimum of 36 semester hours at Georgia State University to complete the major area of the doctoral program.

Required:
- CPS 8350 Biopsychology and Medication (3)
- CPS 8640 Administration and Supervision in Pupil Personnel Services (3)
- CPS 8760 Advanced Topical Seminar in School Psychology (6-9) [topics rotate; students must take course four times (for 12 credits) under the Major Area. 3 credits of Advanced Topical Seminar taken as part of the Ed.S. program may be counted toward the total requirements.]
- CPS 9680 Doctoral Internship (9)
- CPS 9760 School Psychology Research Seminar (3-9) [Must be taken at least 3 times (minimum total = 9 credits). Students must maintain continuous enrollment until doctoral candidacy is reached.]
- CPS 9920 Research and Publication (2). Students must enroll for 2 semesters.
- PSYC 8500 History of Psychology (3)

Note for students entering the program with advanced status: CPS 8680 Internship in School Psychology is an Ed.S.-level internship that serves as the advanced doctoral practicum requirement. The student’s doctoral advisory committee will determine whether the student has completed a comparable course in a prior graduate work and has sufficient skills and field experience to meet the criteria for this doctoral practicum. Based on input from the doctoral advisory committee, some students may be required to enroll in an additional practicum experience.

CPS 9680 Doctoral Internship. Internship is an essential part of doctoral training in school psychology. It provides students with the opportunity to assume substantial responsibility for carrying out the major roles and functions of a practicing school psychologist. Throughout internship, students receive extensive supervision and professional role modeling. The internship is distinguished from the practicum experience by the increased responsibility and independence afforded the student. Internships in school psychology require a full-time experience for one calendar year, or a half time experience for two academic or calendar years.

C. Dissertation (Required: 15)

CPS 9990 Dissertation (15)

Program total: minimum of 71 semester hours (62 semester hours for B.A.-to-Ph.D. students)
Sample Ph.D. Programs of Study

Please note that there is considerable flexibility in deciding when some required courses are taken in the program. These examples are only examples and include considerable flexibility. Courses from the various departments may or may not be offered on the schedules represented in the examples.

2017-2018 Sample BA-PhD program

Notes- this is just a sample, in many cases the order of courses and the specific courses taken can and will differ from this example program, particularly after the second year. All students must develop a program of study (POS) with their advisory committee. The POS includes all common courses in the program, electives used to meet the CEHD core, and additional courses as determined by the student and the advisory committee. The POS is what must be followed to graduate. It can be modified/amended throughout the program. For students in the BA-PhD program, the POS should be developed by the end of the second year. For advanced students, the POS should be developed by the end of the first year. The courses listed here are the minimum requirements. The advisory/dissertation committee may require additional coursework to prepare the student for a specific research project, etc.

M.Ed./Ed.S. coursework
Students should refer to the 2017-2018 M.Ed./Ed.S. School Psychology Program handbook for additional information about completing the M.Ed./Ed.S. requirements.

Year One
Fall (1st Session) total hours (17 + hours)
1) CPS 6040 Introduction to School Psychological Services (3)
2) CPS 6410 Basic Counseling Skills (3)
3) CPS 7490 Individual Assessment I (3)
4) CPS 7495 Assessment Practicum I (2)
5) EPY 8220 Advanced Developmental Psychology: Personality & Socialization (3)
6) CPS 9760 School Psychology Research Seminar (3-9), note: Students must take CPS 9760 a minimum of 3 times and maintain continuous enrollment until the prospectus is defended.
7) CPS 7975 If you have a graduate assistantship, you must enroll in this course. Credit varies by level of GRA.

Spring (2nd Session) 18+ hours
1) CPS 6150 Ethical/Legal Standards in CPS (2)
2) CPS 7510 Individual Assessment II (3)
3) CPS 7515 Assessment Practicum II (2)
4) CPS 7570 Psychological Consultation in the Schools I (3)
5) CPS 8540 Child/Adolescent Psychopathology (3)
6) EPY _________ [Any 7000 level or above course in Learning Theory] (3)
   Examples:
   EPY 7080 – Psychology of Learning and Learners
EPY 8050 – Psychology of Instruction
EPY 8120 – Motivation in Learning and Behavior
7) CPS 9760 School Psychology Research Seminar (3-9)
   note: Students must take CPS 9760 a minimum of 3 times and maintain continuous
   enrollment until the prospectus is defended.
8) CPS 7975 If you have a graduate assistantship, you must enroll in this course. Credit
   varies by level of GRA.

Summer (3rd Session) 9+ hours
1) CPS 7520 Data-Based Decision Making for Instructional Planning in School Psych. (3)
2) CPS 8440 Social/Emotional Assessment of Children and Adolescents (3)
3) EPRS 7900 Methods of Research in Education (3)
4) CPS 7975 If you have a graduate assistantship, you must enroll in this course. Credit
   varies by level of GRA.

Year Two
Fall (4th Session) 18+ hours
1) CPS 7662 Applied Practice I: School Psychology (3)
2) CPS 8665 Intervention Strategies for Students with Learning Problems (3)
3) EPRS 8530 Quantitative Methods and Analysis in Education I (3)
4) CPS 8570 Psychological Consultation in the Schools II (3)
5) CPS 8760 Advanced Topical Seminar in School Psychology (3)
   Note: must take 4 different advanced topics
6) CPS 9760 School Psychology Research Seminar (3-9)
   note: Students must take CPS 9760 a minimum of 3 times and maintain continuous
   enrollment until the prospectus is defended.
7) CPS 7975 If you have a graduate assistantship, you must enroll in this course.

Spring (5th Session) 16+ hours
1) CPS 8662 Applied Practice II: Consultation & Intervention Practicum in School Psych (4)
2) Select one course (3):
   CPS 6450 Group Counseling Systems
   CPS 8400 Introduction to Play Therapy
   CPS 8431 Counseling Skills and Strategies for School-Aged Children [required
   for MINRS]
3) Select one course (3 hours):
   EPSF 7100 Critical Pedagogy
   EPSF 7110 Multicultural Education
   EPSF 7120 Social and Cultural Foundations of Education
4) CPS 8760 Advanced Topical Seminar in School Psychology (3)
   Note: must take 4 different advanced topics
5) CPS 9760 School Psychology Research Seminar (3-9)
   note: Students must take CPS 9760 a minimum of 3 times and maintain continuous
   enrollment until the prospectus is defended.
6) CPS 7975 If you have a graduate assistantship, you must enroll in this course.

Graduate from the M.Ed. program – apply for graduation 2 semesters in advance
Summer (6th Session) 5+ hours
1) CPS 7340 Social/Cultural Issues in CPS (2)
2) EXC ___ Any EXC 7000 level course (3)
   • EXC 7160 Strategies for Social and Emotional Behavior in Students with Behavior
     and Learning Disabilities [required for MINRS]
3) CPS 7975 If you have a graduate assistantship, you must enroll in this course.

****Construct advisory committee and develop program of study

Full Ed.S. Internship Option

Year Three
Note: CEHD Core requirements, School Psychology classes and Advanced Topical
Seminars are placed on this program in a hypothetical order. Your POS should be
constructed based on the specifics of your program and your schedule should be based
on which courses are offered at various times. This will require some flexibility as not all
courses are offered at all times by all departments.

Fall (7th Session) 12+ hours
1. CPS 8680 Internship in School Psychology (6)
2. CPS 8760 Advanced Topical Seminar in School Psychology (3)
   Note: must take 4 different topical seminars
3. CPS 9760 School Psychology Research Seminar (3-9)
   Note: Students must take CPS 9760 a minimum of 3 times and maintain continuous
   enrollment until the prospectus is defended.
4. CPS 7975 If you have a graduate assistantship, you must enroll in this course. Credit
   varies by level of GRA.

Spring (8th Session) 12+ hours
1. CPS 8680 Internship in School Psychology (6)
2. CPS 8760 Advanced Topical Seminar in School Psychology (3) (topical #3)
   Note: must take 4 different topics
3. CPS 9760 School Psychology Research Seminar (3-9)
   Note: Students must take CPS 9760 a minimum of 3 times and maintain continuous
   enrollment until the prospectus is defended.
3. CPS 7975 If you have a graduate assistantship, you must enroll in this course. Credit
   varies by level of GRA.

Complete Ed.S. program
**Summer (9th Session) 9 hours**
1. CPS 8640 Administration and Supervision in Pupil Personnel Services (3)
2. EPRS XXXX Select course from CEHD Ph.D. Research core (3) CEHD Research core #2
3. CPS 7975 If you have a graduate assistantship, you must enroll in this course. Credit varies by level of GRA.

Suggested: Complete Predissertation by end of third year
Begin prospectus design

### Year Four

**Fall (10th Session) 10+ hours**
1. EPRS XXXX Select course from CEHD Ph.D. Research core (3) CEHD Research core #3
2. CPS 8760 Advanced Topical Seminar in School Psychology (3) (Topical # 4)
   Note: must take 4 different topics
3. CPS 9920 Research and Publication (1)
4. CPS 9760 School Psychology Research Seminar (3-9)
   Note: Students must take CPS 9760 a minimum of 3 times and maintain continuous enrollment until the prospectus is defended.
5. CPS 7975 If you have a graduate assistantship, you must enroll in this course. Credit varies by level of GRA.

**Spring (11th Session) 16+ hours**
1. EPRS XXXX Select course from CEHD Ph.D. Research core (3) CEHD Research core #4
2. CPS 9920 Research and Publication (1)
3. CPS 8635 Biopsychology & Medication (3)
4. PSYC 8500 History of Psychology (3)
5. CPS 8760 Advanced Topical Seminar in School Psychology (3) (Topical # 4)
   Note: must take 4 different topics
6. CPS 9760 School Psychology Research Seminar (3-9)
   Note: Students must take CPS 9760 a minimum of 2 times and maintain continuous enrollment until the prospectus is defended.
7. CPS 7975 If you have a graduate assistantship, you must enroll in this course. Credit varies by level of GRA.

**Summer (12th Session) 7 hours**
1. CPS 9920 Research and Publication (1)
2. EPSF XXXX Social Foundations Course from CEHD Ph.D. core (3) (CEHD 2)
3. CPS 7975 If you have a graduate assistantship, you must enroll in this course. Credit varies by level of GRA

Suggested: Defend Dissertation Prospectus by end of fourth year
Prepare for Comps in fifth year
Year Five

**Fall (13th Session) 10 hours**
CPS 9990 Dissertation (3-9)

**Spring (14th Session) 9 hours**
CPS 9990 Dissertation (3-9)

Pass Comprehensive Examination by end of Year Five
*Highly Suggested*: Defend dissertation before Internship

Year Six

**Fall (15th Session) 6 hours**
CPS 9680 Doctoral Internship (6)

**Spring (16th Session) 6 hours**
CPS 9680 Doctoral Internship (6)
Key Steps in Ph.D. Program

1. Admission to the School Psychology Ph.D. Program
2. Assignment of an academic advisor
3. Formation of a Program Advisory Committee and submit Program of Study (POS)
4. Completion of M.Ed./Ed.S. requirements and Ed.S. residency
5. Establish Doctoral Residency
6. Completion of Predissertation Research Project.
7. Identification of Dissertation Committee Chair/Committee
8. Completion of Written Comprehensive Examination
9. Approval of Dissertation Prospectus
10. Recommendation for advancement to candidacy for Ph.D. degree
11. Completion of dissertation research
12. Oral defense of dissertation
13. Completion of doctoral internship
14. Recommendation for Ph.D. degree
Doctoral Residency Requirement

The purpose of the doctoral residency requirement is to provide students with a set of extended experiences beyond those offered by formal coursework. During this time, students should spend considerable time on campus involved in activities related to research, scholarship, teaching, service, and professional development. Some examples of these activities include a) attending dissertation defenses scheduled within the department, b) attending colloquia and/or symposia offered in the department, on campus, or in the metropolitan area, c) working with faculty members on research projects, and/or d) assisting in developing instructional curricula for predoctoral-level school psychology training. Please note that these examples are not exhaustive and that a student’s doctoral advisory committee and the school psychology faculty may approve other activities.

A minimum of 18 semester hours over a period of two consecutive semesters, or 27 hours over three non-consecutive semesters is necessary to fulfill the doctoral residency requirements. During this time, doctoral students must restrict any outside employment to no greater than 20 hours per week. It is highly recommended that students complete their residency requirements within the first six semesters (three years) following admission into the doctoral program.

Comprehensive Examination

A comprehensive examination is required of all doctoral students. The comprehensive examination is designed to provide doctoral students with an opportunity to demonstrate their expertise and integration of knowledge across the school psychology program content areas. These areas include: (a) Theoretical Foundations of Psychology and Education; (b) Professional Issues in School Psychology; (c) Research Design and Methodology; (d) Psychological and Behavioral Assessment; (e) Consultation. The comprehensive examination consists of five days of written examination and is offered twice each year. With approval of their doctoral advisory committee, a student may take the Examination for Professional Practice in Psychology (EPPP) in lieu of the written exam. It is recommended that the examination be scheduled soon after the completion of the residency requirements.

It is highly recommended that doctoral students participate in study groups well in advance of the exam date to help them prepare for the examination. More information concerning the comprehensive examination is found in the Guide for Doctoral Comprehensive Examination, which is available in the CPS department.
Please note: Students will NOT be allowed to apply for internship prior to successful completion of the comprehensive examination.

Doctoral Internship

The pre-doctoral internship is an essential component of doctoral education in professional psychology. It provides students with the opportunity to assume substantial responsibility for carrying out the professional roles and functions of a school psychologist. Throughout the internship experience, extensive supervision, ongoing training, and professional role modeling is provided. The internship is distinguished from the practicum experience by the increased independence and responsibility given to the intern and by the more intense nature of client contact. Internships in school psychology require a full-time experience for one academic or calendar year or a half time experience for two academic or calendar years. Two thousand (2,000) documented hours are required.

Internship is undertaken after successful completion of coursework; practica; predissertation research project; and comprehensive examination. Doctoral students are strongly encouraged to defend their dissertation prospectus prior to beginning their internship.

The coordinator of doctoral internships in the CPS department - Dr. Joseph Hill- assists students in securing appropriate placements for internship. The coordinator also assists students by providing them with resources and materials about internship, certification, and licensure policies and procedures.

The most comprehensive listing of internship offerings is provided by the Association of Psychology Post-doctorate & Internship Centers (APPIC) Directory of Internship Programs in Professional Psychology. In this directory, over 400 internship programs (both APA-accredited and non-APA-accredited) are described. In addition, the American Psychological Association (APA) and the National Association of School Psychologists (NASP) provide a joint directory of approved internship sites in school psychology. These directories, as well as individual announcements and brochures received directly from internship sites, are kept in the CPS department library.

Doctoral students in the school psychology program can satisfy their internship requirement in either APA-accredited or Council of Directors of School Psychology Programs (CDSPP) equivalent internships. They may also choose to carry out their internship in a school setting or a mental health setting with an educational focus. For non-APA accredited internships, a brief statement of its conformance to standards established by the Council of Directors of School Psychology Programs (CDSPP), the Association of Psychology Post-doctorate & Internship Center (APPIC), and the American Association of State Boards of Psychology (AASBP) must be filed with the Coordinator of Doctoral Internships. The student’s doctoral advisory committee and the director of the school psychology program must approve this statement.
Please note that there are no school-based APA-accredited internship sites in Georgia. Thus, interested students should consider completing their internship in an out-of-state location. For example, school-based APA-accredited programs are available in Tennessee, Virginia, Texas, Illinois, Louisiana, and Nebraska (and other locations). For students who wish to complete an internship at a non-school based APA-accredited program, some clinical internship sites are located in Georgia and in the Southeast.

In 1987, APPIC resolved that all internship applicants must complete 600 hours of supervised practice prior to beginning the internship, and a recommended total of 800 hours. In order to assure that these standards are met, students are asked to document their earned hours of supervised practice prior to their internship in the manner established in the form *Documentation of Supervised Practice* attached at the end of this handbook. Please note: completion of the Ed.S. internship (1,200 hours) at Georgia State University meets this requirement.

A close liaison is maintained between the school psychology program and the internship agency in order to evaluate the student’s progress throughout their internship experience. The coordinator of the doctoral internship, the student’s doctoral advisor, and the student’s on-site internship supervisor are actively involved in monitoring student progress. In addition, students evaluate their internship agency’s adequacy and appropriateness as an internship site.

Students may obtain further information regarding the internship experience by consulting these references:

---

**CPS Department Policies on Predissertation and Dissertation Research**

**General**

Each year the CPS Department Chair will devote a portion of one Fall Semester faculty meeting to an orientation and discussion of CPS Research Requirements for the benefit of new and returning faculty.
All projects must comply with GSU IRB requirements; including renewal of IRB approval.

**Dissertation**

Students are required to complete a dissertation. The dissertation should be presented in the formats accepted by the GSU CEHD and following the rules of the College and University. The student is required to be the primary researcher on the dissertation. Collaborative projects are acceptable as long as each student has an independent, identifiable focus. The dissertation prospectus defense cannot occur before the predissertation project is completed.

Authorship on any publications derived from the dissertation will be determined by the student and research mentor, although in most cases the student will be the primary author on any central manuscripts derived from the project. Completion of the dissertation is determined according to established CEHD procedures.

**Predissertation Project**

Students are required to complete a predissertation project. The purpose of the predissertation is to provide the student with a substantive research experience prior to the dissertation. The project should be prepared in the form of a journal article (as opposed to a dissertation or thesis). Although the student will most often be the first author of the manuscript, the student and research advisor will determine the authorship of any publications or presentations that are connected to the project. Collaborative projects are acceptable as long as each student has an independent, identifiable focus. The advisor and the student will determine when the project is completed. The predissertation project must be completed before substantive work can begin on the dissertation. Program requirements for the project must be presented in the relevant student handbook.

A prior thesis, project, or publication can not be counted as the predissertation project. An extension of such a project may be acceptable if approved by the research advisor.

Adopted 1/2007

**Dissertation**

Successful completion of the dissertation is the culmination of extended and meaningful research under the supervision of the student’s graduate advisor and dissertation committee. It is a time of celebration, and a time for reflection on the professional and personal growth attained by the student during his or her doctoral training. Successful completion of the dissertation does not mark an end to such growth, but
serves as a springboard towards future contributions to the field of school psychology.

The first step towards a dissertation is for students to develop a prospectus of their intended research study and then present the prospectus to their Dissertation Committee for approval. The prospectus serves as a contract between the student and the committee members by which the final product is judged. The doctoral dissertation involves original research in the student’s chosen area of specialization. The student’s doctoral committee determines the acceptability of the dissertation and requires the student to defend its contents in an oral examination. The dissertation is expected to demonstrate extensive expertise in a particular area and extend existing literature in that area. It is also expected to contain an appropriate research design and analyses for the particular research questions investigated. Finally, the dissertation is expected to include a thorough review of the literature and a well-supported rationale, and to demonstrate excellent writing skills.

Students must successfully defend their dissertations before the faculty and other interested persons. This oral dissertation defense typically lasts about two hours during which students present a summary of their research study and defend its design, procedures, and conclusions.

The latest edition of the *Publication Manual of the American Psychological Association* must be used to govern the style of the dissertation. Format requirements can be found in a guide entitled *Instructions Related to the Preparations of Dissertations and Theses in the College of Education & Human Development*. Copies of this document are provided to students upon their admission to the program. Further, a Thesis and Dissertation Assistance Unit, established by the Counseling Center, employs a writing specialist to help students organize, develop, and compose their thoughts related to the dissertation. Finally, copies of all dissertations are available in the library in hard copy (or more recently in electronic format) for students to review.

Students in the doctoral program attend informal program meetings during the academic year and the summer to help them formulate research ideas for their dissertation. In addition, students are expected to attend dissertation defenses within the department in order to understand how the process works. Attendance at defenses also enhances scholarly awareness and shows support for fellow students’ efforts.

**Prospectus Timeline**

1. The prospectus and the abstract must be submitted to the doctoral student’s Chair and committee members at least 2 weeks (not including semester breaks) prior to submission to the Office of Academic Assistance (OAA). Some dissertation chairs may request more than two weeks for review of the
documents. It is the student’s responsibility to clarify this deadline with the dissertation chair and the individual committee members.

2. After receiving a student’s prospectus, if a faculty member does not respond to the student within two weeks (not including semester breaks), the student can assume that the faculty member is in agreement with the proposed defense date. This does not mean that the committee member will have no questions or edits for the student at the defense meeting.

3. The prospectus abstract must be submitted to the Department Chair at least 7 days before submission to OAA.

Dissertation Timeline

1. Students must submit their dissertations to their committee members at least 2 weeks (not including semester breaks) prior to their projected defense date. Some dissertation chairs may request more than two weeks for review of the dissertation. It is the student’s responsibility to clarify this deadline with the dissertation chair and the individual committee members.

2. After receiving a student’s dissertation, if a faculty member does not respond to the student within two weeks (not including semester breaks), the student can assume that the faculty member is in agreement with the proposed defense date. This does not mean that the committee member will not have questions or edits for the student at the defense meeting.

3. The Dissertation Defense Announcement Form must be submitted to the Chair of the student’s committee for approval. Then the student should submit it to the Department Chair at least 7 days prior to turning it in to OAA.

4. After successfully defending the dissertation, the student and the committee chair are responsible for completing edits required by the committee. The committee chair does not sign the dissertation until all edits are complete.

5. After all edits are completed, the student submits the dissertation to the department chair for review two weeks prior to submitting it to OAA.

Professional Organizations

As professional school psychologists, doctoral students are expected to stay abreast of current developments in the field of school psychology. One way of doing this is to belong to professional organizations. Students are encouraged to become members of, and attend conferences sponsored by, various school psychology organizations. The two major organizations in the field of school psychology are Division 16 (School Psychology) of the American Psychological Association (APA) and the National Association of School Psychologists (NASP).
Other worthwhile organizations to consider joining include the Georgia Psychological Association (GPA), the Georgia Association of School Psychology (GASP), the Council for Exceptional Children (CEC), and the American Educational Research Association (AERA).

Students are not only expected to become members of school psychology professional organizations, but also to be actively involved in presenting papers and posters at local, state, and national conferences sponsored by these organizations. Doctoral students’ independent research and collaborations with faculty members (e.g., predissertation research project) generate data for such presentations and stimulate worthwhile dissertation research topics.

**APA Division 16**
The American Psychological Association (APA) is the major national organization devoted to advancing the field of psychology as a science, as a profession, and as a means of promoting the mental health and welfare of all people. With over 65,000 members, APA fosters communication among psychologists and the public by publishing psychology journals, holding annual conferences, and disseminating current research findings. Division 16 has a membership of over 2,500 members and is the leading voice of school psychology within the broader realm of psychology. Division 16 publishes a professional journal, *School Psychology Quarterly*, and a newsletter, *The School Psychologist*. All GSU school psychology students are strongly encouraged to become student members of APA Division 16.

**Student Affiliates in School Psychology**
Student Affiliates of School Psychology (SASP) at Georgia State University is an organization providing academic and professional support for graduate students in the field of School Psychology. The focus of this SASP chapter is to provide our students with an academic and social network, and opportunities for professional development, community service and research activities. GSU SASP is also interested in promoting awareness of school psychology and recruiting new students to our program at Georgia State University. All current students are members of the local SASP chapter and may become members of the national SASP.

**NASP**
With over 26,000 members, the National Association of School Psychologists (NASP) is an important school psychology organization. NASP is committed to enhancing psychological services to children and adolescents in the schools by improving the effectiveness and stature of school psychologists across the country. NASP publishes a professional journal, *School Psychology Review*, and a newsletter, the *Communique*. NASP also publishes an extensive array of edited books for school psychologists. All GSU school psychology students are strongly encouraged to become student members of NASP.
Appendix A

Prerequisites of the Ph.D. Program

The GSU School Psychology PhD program is designed for both students directly from undergraduate degree programs and for those who already possess M.Ed./Ed.S. or equivalent degrees in school psychology. We value graduates of various undergraduate degree programs such as psychology, education, and special education. We require a basic selection of undergraduate psychology courses for acceptance. These can be taken as an undergraduate minor or later as stand alone courses for students who did not include them in their undergraduate degrees.

The programs of study for the Masters of Education (M.Ed.) and Educational Specialist (Ed.S.) degrees at GSU are listed above as the first three years of the PhD program. This list can serve as a reference for students who wish to apply as Post-Ed.S. students. Further information about these programs may be obtained in the College of Education & Human Development Graduate Bulletin and the combined M.Ed./Ed.S. Student Handbook.

Students who enter the Ph.D. program with advanced or specialist-level training in school psychology must complete all requirements of the GSU M.Ed./Ed.S. degree program or their equivalents either prior to or concurrent with their doctoral studies. Such students must also submit a portfolio of work that demonstrates competency in the goals and objectives set by the GSU school psychology program. The faculty will evaluate prior graduate work and the portfolio. Additional coursework, remedial coursework, or practicum experiences may be required for students to meet program requirements prior to, or concurrent with beginning doctoral studies at GSU. Please note that GSU has a combined M.Ed./Ed.S. degree program in which students initially undertake M.Ed.-level training in preparation for more advanced Ed.S.-level training. Previous education in a masters level curriculum may or may not count towards the GSU combined M.Ed./Ed.S. program. In most cases, at most only a few courses from a related masters degree will apply to the GSU M.Ed./Ed.S. in School Psychology.
